

Unsafe Field Policy

If fields are open per the city of Halifax, but when at the field, the safety of the players or the field is deemed a risk by one or both captains, these are the rules to follow:

- If both captains agree to not play, regardless of how many players on either team are present, game is cancelled and game score is to be entered as "cancelled".
- If one captain does not want to play, and has the minimum number of players present at the scheduled start time, game is cancelled, and the game score is to be entered as "cancelled".
- If one captain does not want to play, and neither team has the minimum number of players present at the scheduled start time, game is cancelled, and the game score is to be entered as "cancelled".
- If one captain does not want to play, but does not have the minimum number of players present at the scheduled start time, game is cancelled, and the game score is to be entered as a "forfeit", with the team having less than the minimum number of players to be penalized with the "forfeit".
